Embedding a YouTube Video into Powerpoint
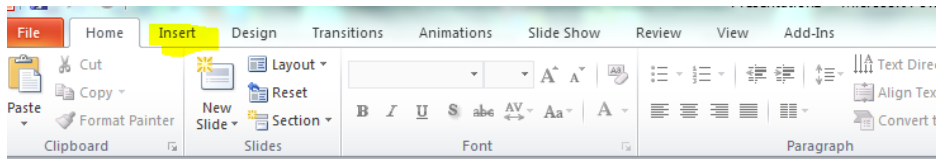

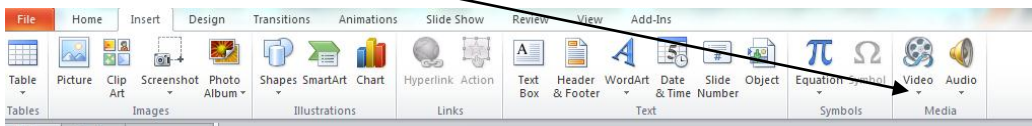

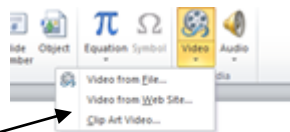

1. **Open your Powerpoint presentation. Click on the slide where you would like to insert your video. On the ribbon/toolbar, click on insert**

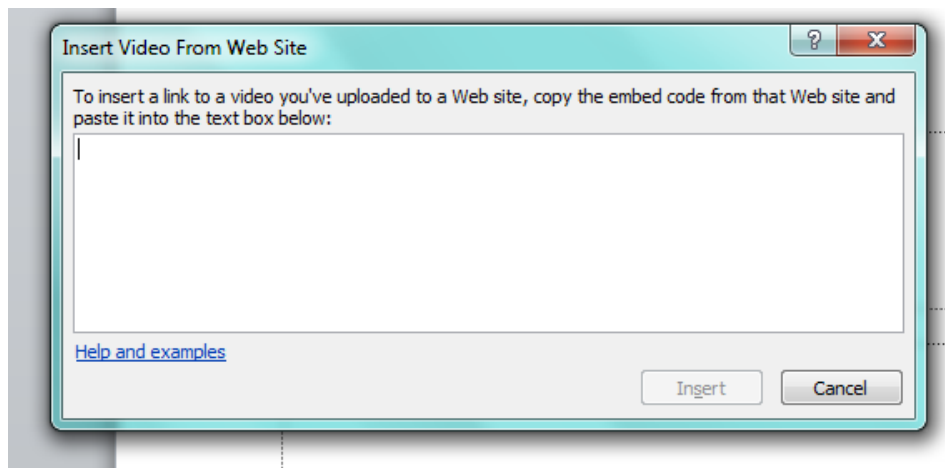

2. **Click on the video icon.**

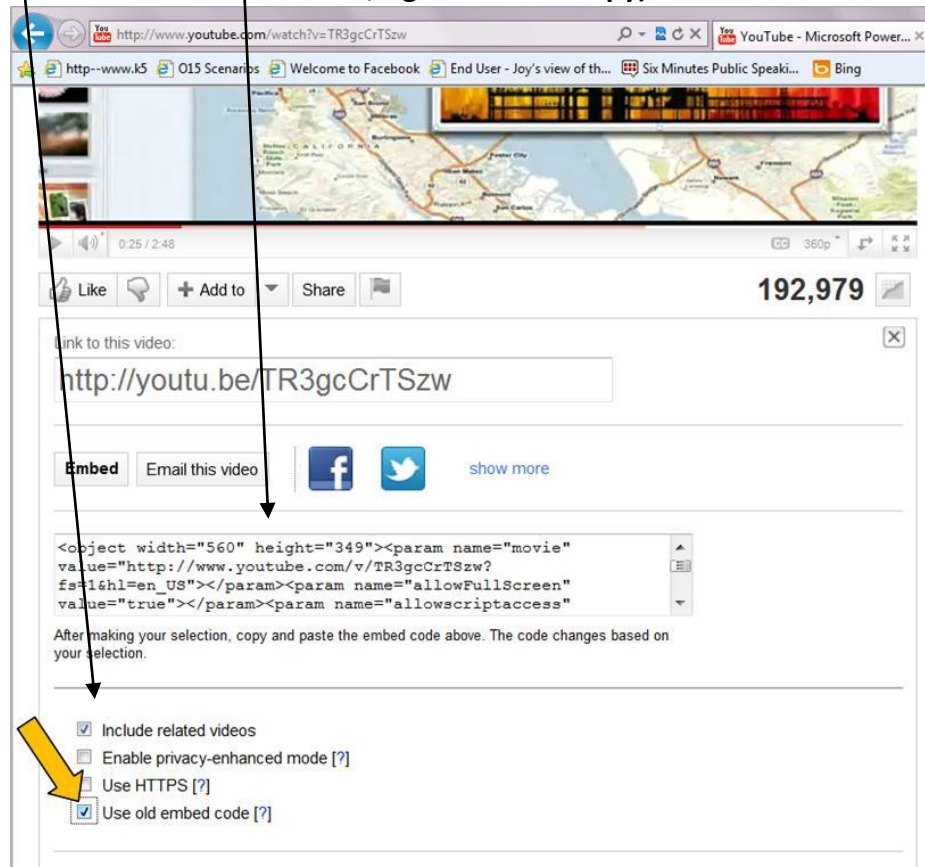

3. **Click on the dropdown menu**

   Choose Video from Web Site

4. **A text box will pop up. To insert a link to a video you've uploaded to a Web site, copy the embed code from that Web site and paste it into the text box below:**
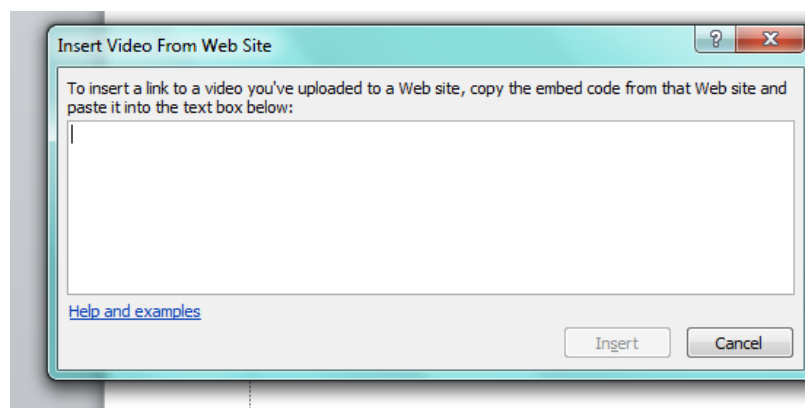

5. Navigate to your *You Tube* Video on the Internet, on *YouTube*, click **Share**, click **Embed**, select the Use old embed code checkbox, and then copy the embed code.
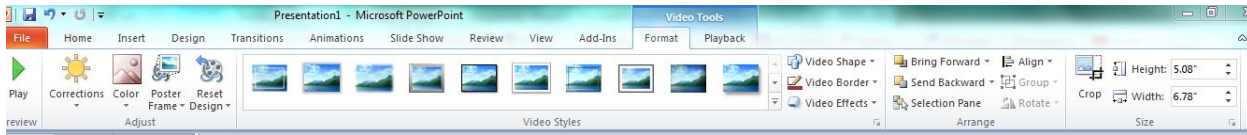

6. Uncheck include related videos.

   Copy the embed code   (click in the box use CTRL+ C   to copy the code or highlight all the code in

   the box, right click and copy)

7. Back in PowerPoint, click in the Insert Video from the Web Site box. Paste the embed code, and then click Insert.

After the video is embedded, click on the video, Video Tools pops up on the ribbon/toolbar and you can format your video.

Remember this only works when you are connected to the internet, this is a link to YouTube, you are not downloading a video, it plays up on You Tube.
